- o Docker

Languages :

• Arabic (Native) • English(Intermediate)

Projects:

Library website :

It is a project that manages and stores books information electronically according to students' needs. The system helps both students and library managers to keep a constant track of all the books available in the library. It allows both the admin and the student to search for the desired book.

he wants Tools: Frontend(Bootstrap/js)/Backend(Laravel)/API

 <https://github.com/MostafaAskar/library>

Cafeteria System :

A system cafeteria through which the user can request to see the cafe's products and the way they are presented, and he can reserve and order them for the place he wants
The admin can also manage the system, see the product, confirm the reservation, and have all the rights so that he can develop the site .

Tools : Frontend(Bootstrap/js)/Backend(PHP)

📄 <https://github.com/MostafaAskar/Cafeteria>

Admin Dashboard Company :

Dashboard admin has all the powers of the Company site so that he can edit, correct, delete, add and all the operations necessary to follow up and develop the site

Tools: Frontend(Bootstrap)/Backend(PHP)

📄 <https://github.com/MostafaAskar/Dashboard/tree/mostafa>

E-commerce website:

It is an E-commercial site that displays products to the user. The user can browse those products and know their details as he wants, and then he can buy the product and deliver it to the destination he wants

Tools: Frontend(HTML, CSS, JQuery & Bootstrap)
